BLUESCAPE

FLOW

Where Vision Meets Velocity

The only visual workspace built for the scale, speed, and fidelity your design work demands

AEID teams using tools like Miro or Mural quickly hit limits: slow load times, degraded visuals, broken-up boards, and constant workarounds for large files. These platforms weren't built to handle dozens, much less hundreds, of high-resolution drawings, floorplans, elevations, renderings, or videos in a single view.

Bluescape is the only visual workspace made for high-resolution design at scale. One shared space for every drawing, markup, decision, and deliverable.

No compression

No lag

No asset or board limits

Just clarity, speed, and momentum

Your Whole Project. One Canvas.

A purpose-built visual platform for teams who demand clarity, scale, and speed, without compromising quality or breaking up projects across boards.

With Bluescape, AEID teams can:

- **Drop in hundreds of ultra high-resolution files** like moodboards, elevations, renders, schematics, and engineering markups, in a single workspace. No compression. No performance drag.
- **Review high-resolution video content** with in-frame commenting, image captures, frame-by-frame viewing, and synchronized viewing across distributed users.
- **Embed 3D walkthroughs, render captures, and multi-format design assets** alongside project documentation and markups.
- **Run large, multi-phase projects in a single persistent workspace;** no need to break content across disconnected boards.
- **See, compare, and comment on work in context** with visual version tracking, markup history, and side-by-side layout views.

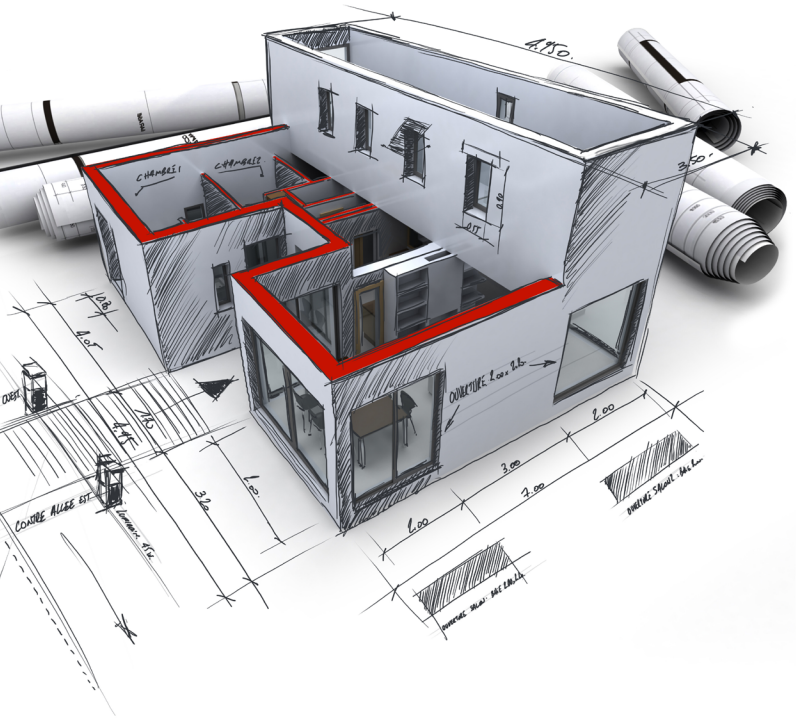
Your Entire Project Pipeline, In One Workspace

Bluescape is designed for the kind of creative work that breaks other tools. Where other platforms fragment the process, Bluescape brings it together, with unmatched fidelity and speed.



- **Concept & Schematic Design:**
  Share mood boards, sketches, and early concepts for rapid iteration and stakeholder input.
- **Design Reviews & Stakeholder Feedback:**
  Conduct side-by-side comparisons, overlay markups, track feedback, and align faster.
- **Client Co-Creation & Approvals:**
  Replace the slideshow with an immersive, shared space for real-time feedback.
- **Multi-Firm Coordination:**
  Centralize work between studios, consultants, and engineers with secure, role-based access controls.
- **Project Tracking & Handoff:**
  Create a persistent visual record of every decision, file, and comment.
- **Export Deliverables:**
  Instantly generate client-ready, pixel-perfect PDFs or PowerPoint decks from your live workspace.

How Bluescape Stacks Up vs. Miro

Feature	BLUESCAPE	Miro
Max File Size – Images	50 MB*	30 MB
Max File Size – Videos	150 MB*	Not supported for direct upload; embedded links only
Max File Size – Audio	150 MB*	Not supported for direct upload; embedded links only
Max File Size – Documents	1 GB*	30 MB
Max Image Resolution	125 Megapixels	32 Megapixels
Max Image Dimensions	11,000 x 11,000 pixels	8,192 x 4,096
PDF Handling	Native rendering with multi-page support	Limited rendering; issues with large PDFs

*Private Bluescape instances available with increased file sizes and custom configurations.

BLUESCAPE

Built for the Way Architects and Designers Work

Your design process is deeply visual—and deeply iterative. From schematic sketches to full drawing sets and immersive presentations, Bluescape keeps the entire project in one high-fidelity space that's fast, flexible, and made to scale.

Bluescape isn't just for sharing files. It's where real work happens.

- **High-res everything, without compromise**
  Load hundreds of ultra-detailed images, renders, drawings, or videos with no lag, no compression, no file errors.

- **No fragmented boards or projects**
  Manage version histories, approvals, and production assets from within the tools you already use.
- **Engineered for decision-making**
  Enrich workflows with AI-powered enhancements, integrations, and insights.
- **Connected to your creative and technical stack**
  Native integrations with the tools you rely on, including Box, Microsoft 365, Google Drive and ShotGrid.

- **Make it your own**
  Deep API access for custom integrations, automations, and workflow control.
- **Security even the government trusts**
  Trusted by federal agencies, top global architecture firms, and the world's largest movie studios—with FedRAMP-grade protection and enterprise-level controls.

Don't Just Take It From Us…

> **"The paper savings and time savings for our architects is simply amazing."**
> — Global IT Director, Leading Architecture Firm

> **"This is truly a paradigm shift for visual projects."**
> — Executive Producer, Fortunate 1000 Entertainment Company

> **"We shaved 20 months off the development process."**
> — Automotive Design Director
